**RE: Stronger guidelines for antibiotic use**

Dear Commissioner Henney:

I am writing to support the development of stronger guidelines concerning the use of antibiotics in animals. It is my concern that antibiotics, which are also used to treat infections in humans, are being used inappropriately by factory livestock producers. It is my feeling that we must restrict the use of these antibiotics in order for them to retain their value to fight human infections.

Thank you for your consideration of my opinion.

Sincerely,

Terry K. Hiestand
